

Toward Increasing Effectiveness of Capacity-building

-For a better response to increasing needs for
(I)NDC preparation/implementation and beyond-

9th November, 2016

COP22 JAPAN Pavilion Side Event

Emiko Matsuda & Makoto Kato

Overseas Environment Cooperation Center, Japan
(OECC)

Aim of the event

- Increasing needs for capacity-building cooperation under the Paris agreement
- Good practices from developing countries, multilateral and bilateral development partners
- This event will be organized in a panel discussion style.

Paris Agreement

INDC, Adaptation communication, NAP and Transparency

Means of Implementation

Finance, Technology and Capacity building

Outline of the event

Flaming presentations

- ◆ Emiko Matsuda (OECC)
- ◆ Prof. Nishioka / IGES
- ◆ Molly White/Greenhouse gas Management Institute

Tree Panels discussion along with following guiding questions

1. How countries have taken account toward/beyond the PA?
2. What are key lessons learned from recent cooperation programme ?
3. How do we assess the effectiveness and efficiency of capacity-building

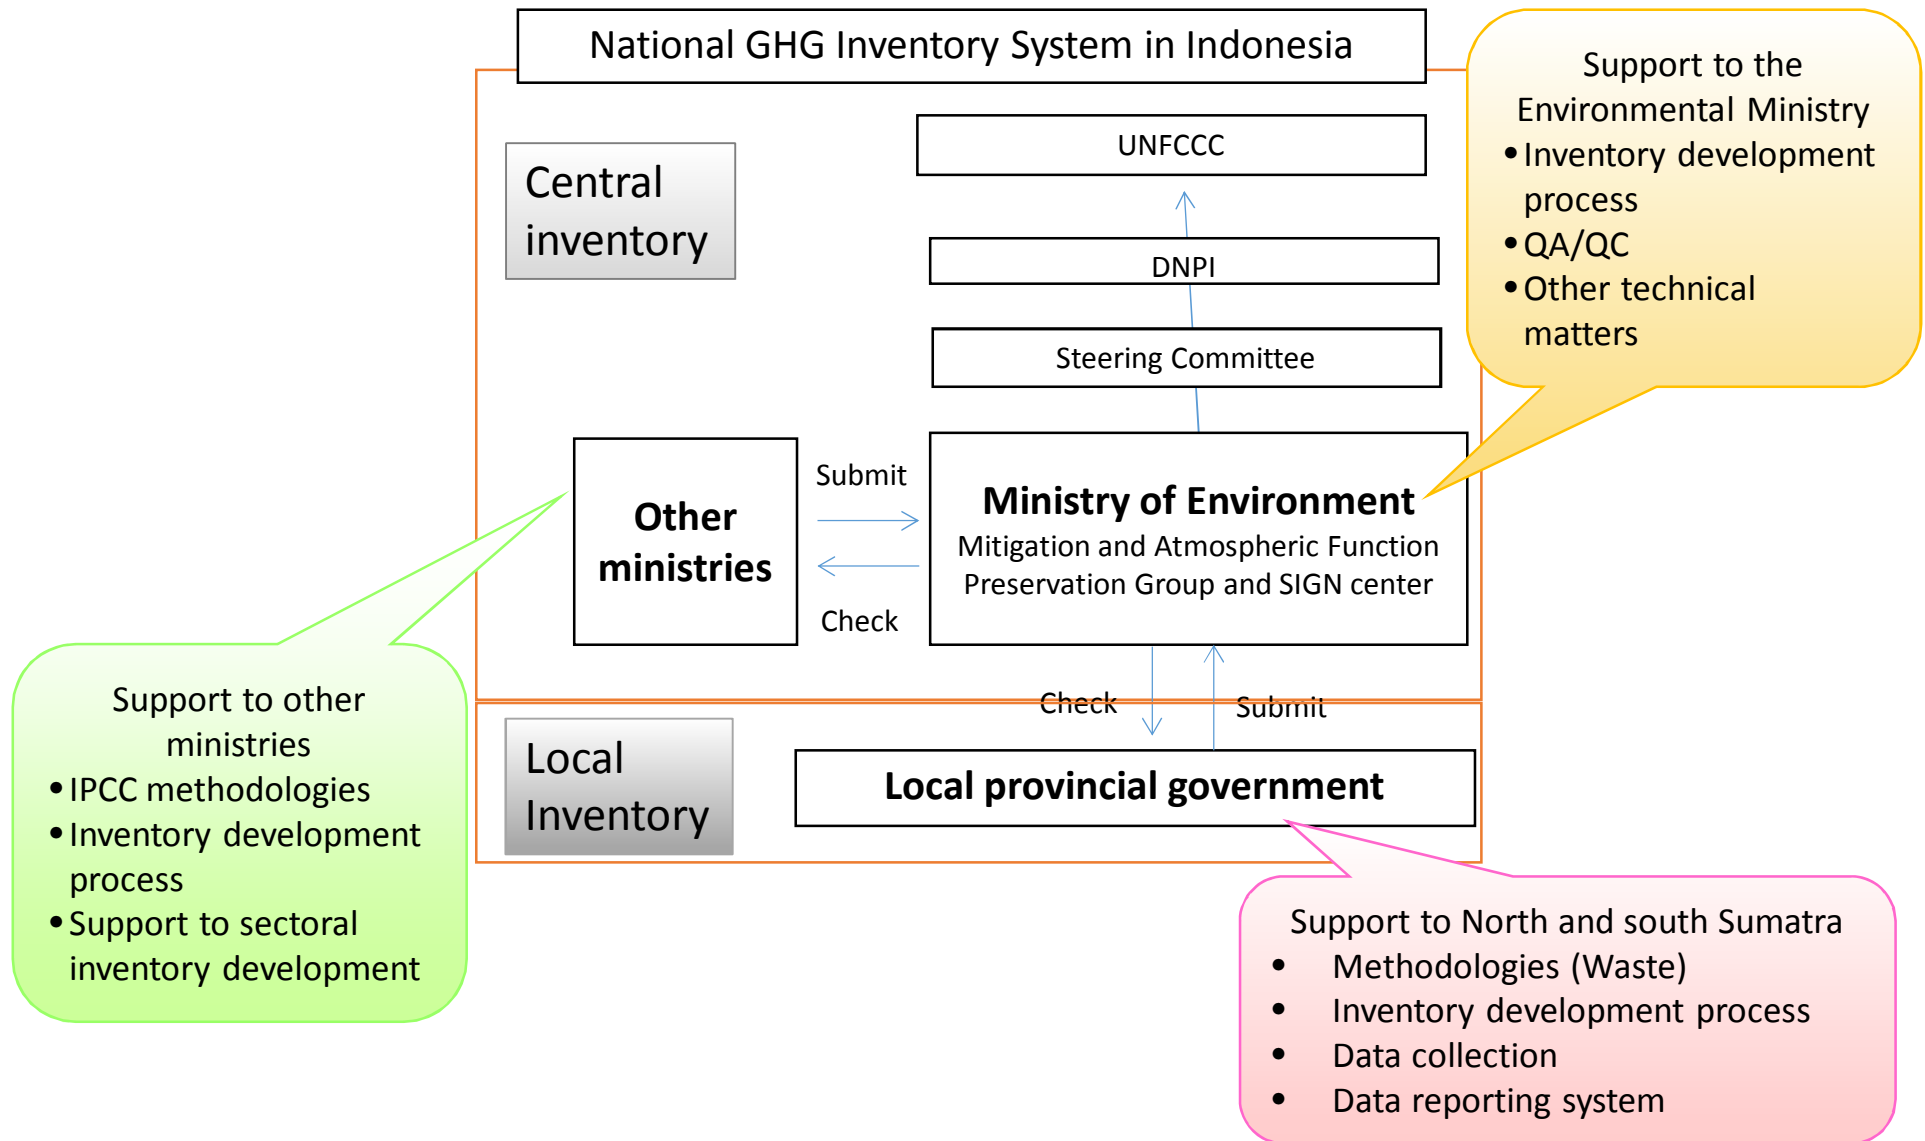

Cooperation with Japan

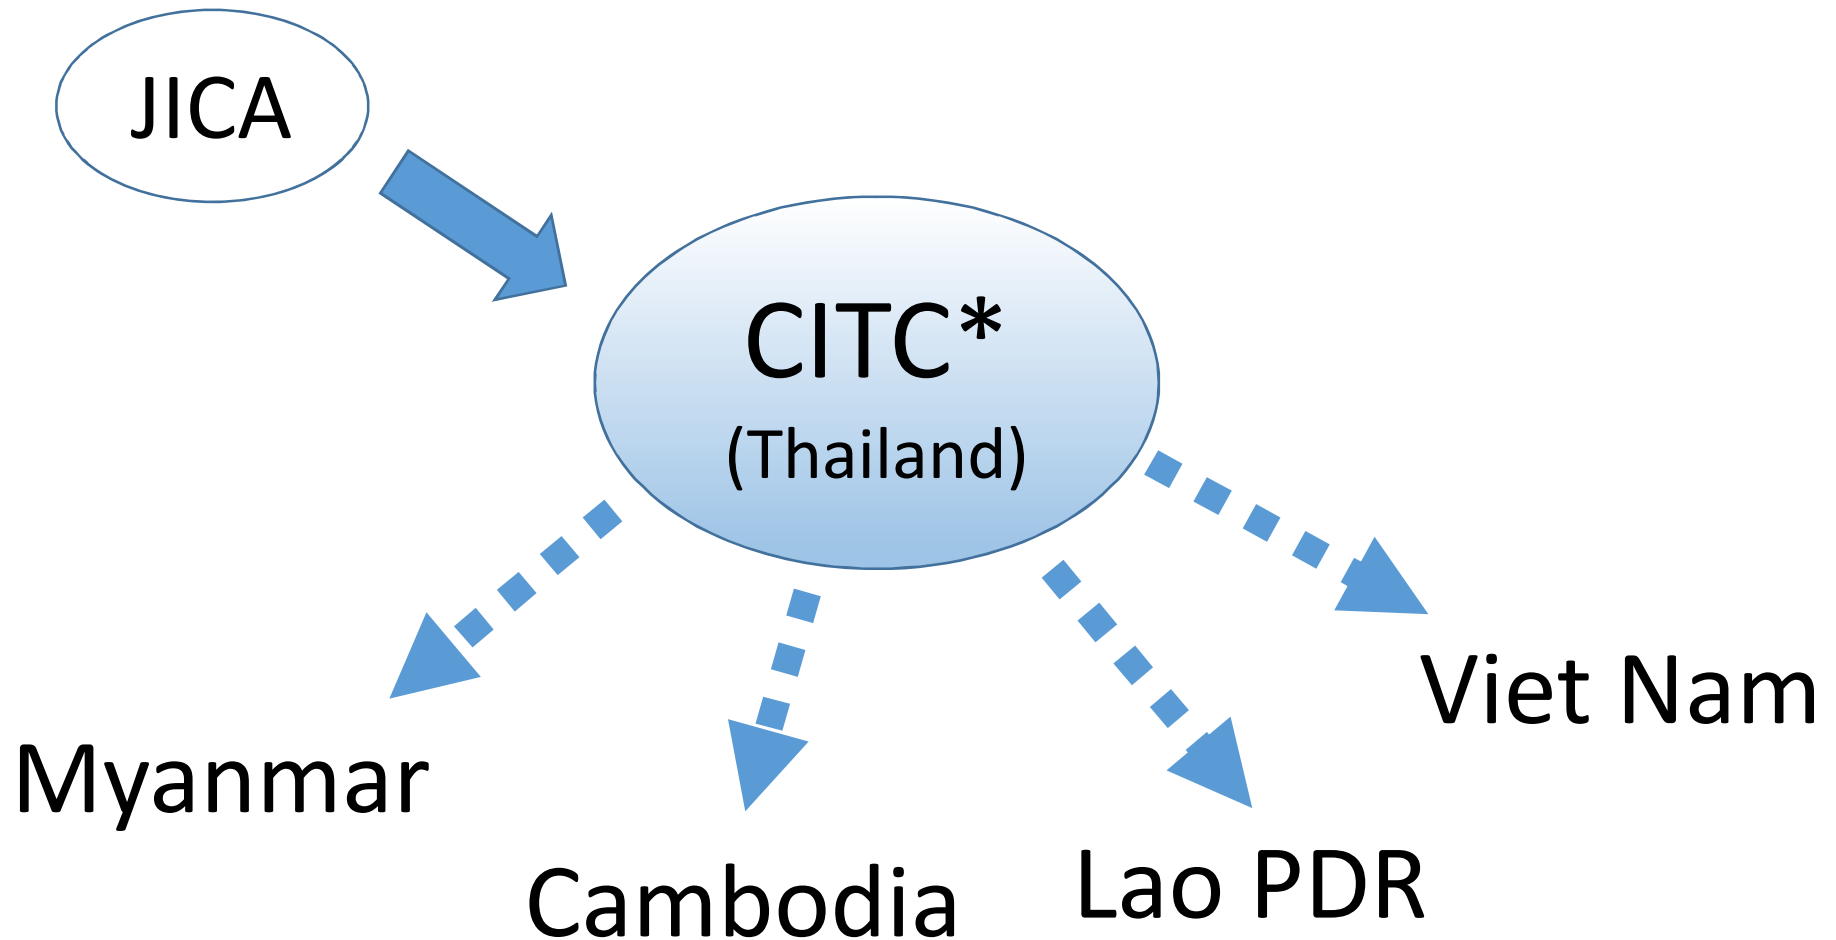

- Support of custom made style (JICA)
- Triangle Cooperation (JICA)
- City to City Cooperation (Yokohama and Bangkok)
- Net work for mutual learning (NIES)

Custom made support

(Japan International Cooperation Agency: JICA)

Triangle/South south cooperation

* Climate Change International Technical and Training Center

City to City Cooperation

City of Yokohama

Yokohama Partnership of Resources and Technologies

- Know-how to low carbon development
- Environmental technology

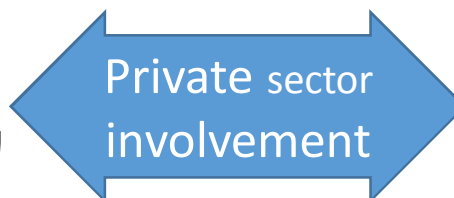

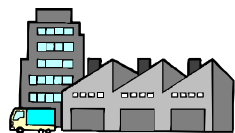

Bangkok Metropolitan Administration

Climate Change Master Plan

- Energy
- Transport
- Waste management
- Urban Green Planning
- Adaptation

Net working for mutual learning

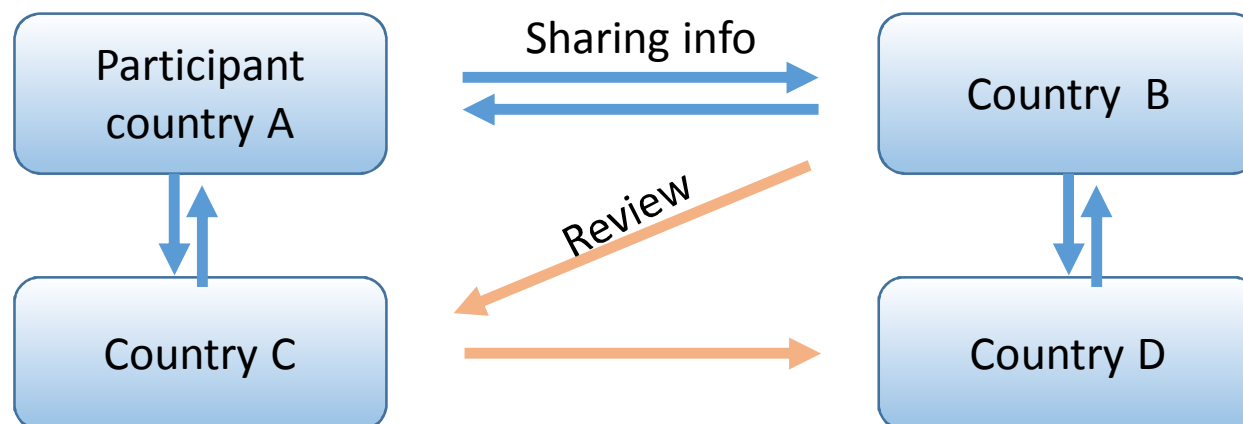

(a case or workshop on GHG inventory in Asia)

Greenhouse Inventory Office of Japan (GIO)
National Institute of Environment and Science (NIES)

WGIA (Since 2003)

To improve the accuracy of GHG inventories in the Asia region
the support of the Ministry of the Environment, Japan
to cooperate and share information and experience related to the development of GHG
inventories.

include researchers and government officials

Thank you for your attention.

- Support of custom made style (JICA)
- Triangle Cooperation (JICA)
- City to City Cooperation
(Yokohama and Bangkok)
- Net work for mutual learning (NIES)

Guiding question

1. In responding new challenges toward and beyond the Paris Agreement how countries have taken account?
2. What are key lessons learned from recent cooperation programme and what are feedbacks/hints for development partners in programming capacity-building in future
3. How do we assess the effectiveness and efficiency of capacity-building
