

NDC Policy Choices and Levels of Effort

Policy Surveillance and Transparency: Evaluating the Comparability of National Mitigation Efforts

Nov 15, 2016 1:30 PM to 2:45 PM

Japan Pavilion
Blue Zone COP22

The Paris Agreement signals a new era for international collaboration on climate change, and requires continuously increased ambition from all parties. This side event will feature new modeling insights from three international research institutions. Panelists will focus on the transparency and comparability of mitigation effort as defined by the nationally determined contributions (NDCs) of major emitters, including the European Union, Japan, Russia, India, South Africa, China, and the United States.

Speakers

- Raymond J. Kopp, Senior Fellow and Co-Director, RFF Center for Energy and Climate Economics, Resources for the Future
- Joseph E. Aldy, Associate Professor of Public Policy, Harvard University's Kennedy School of Government; and Visiting Fellow, Resources for the Future
- Keigo Akimoto, Group Leader, Systems Analysis Group, Research Institute of Innovative Technology for the Earth; and Guest Professor, Graduate School of Art and Science, University of Tokyo, Japan
- Lara Aleluia Reis, Researcher, Fondazione Eni Enrico Mattei; and Euro-Mediterranean Center on Climate Change, Italy
