## **JAPAN PAVILION**

**“Lead the world forward”**

<http://copjapan.env.go.jp/cop/cop24/en/>

The whole world needs to enhance measures to reduce GHG emissions in order to achieve the 2.0-degree target and pursue effort toward the 1.5-degree target. Climate actions are sources of competitiveness. A virtuous cycle between the environmental protection and economic growth and a paradigm shift for technological innovation led by business are indispensable. Japan will foster measures to create innovation and to become a model for the world in the achievement of the virtuous cycle between the environmental protection and economic growth, taking advantage of its advanced technologies and knowhow.
